

# BioScience Project

## Summer e-Internships in Neuroscience research

### **Students:**

Intern with BioScience Project this summer. You will learn how to: design a research project, use biological databases and webtools, mine/analyze data, and prepare a scientific communication while working from home on your own schedule.

### **What you will gain:**

A foundation for a prospective career, transferable skills, work experience to add to your resume, intellectual growth, an opportunity to work with professional scientists.

### **What you need to participate:**

A 4-week commitment (~ 10 hrs/week), access to a computer with an internet connection. All students are welcome to participate in our internship program regardless of experience and academic performance.

### **About**

BioScience Project is a non-profit research and teaching laboratory committed to the continuation of biomedical research and science education.
