Figure 2A

The graph illustrates the mean percentage change from baseline in EASI (Eczema Area and Severity Index) over weeks for various treatments. The treatments and their corresponding mean percentage changes include:

- **Tralokinumab (Wollenberg et al)**
- **Dupilumab (Beck et al, Simpson et al, Thaci et al, Blauvelt et al, and de Bruin-Weller et al)**
- **Nemolizumab (Ruzicka et al and Kabashima et al)**
- **Lebrikizumab (Simpson et al)**
- **Baricitinib (Guttman-Yassky et al)**
- **Ustekinumab (Saeki et al)**
- **Methotrexate (Goujon et al and Schram et al)**
- **Ciclosporin (Goujon et al)**
- **Azathioprine (Schram et al)**

The graph also includes a comparison with **PLACEBO** data, indicating the effectiveness of each treatment over time.
